

How the EMERALD EXTRAS EXECUTIVE PAKS Program Works

Each Emerald Extras Executive Pak includes its own product categories and product lists, from which growers may select. The sugar beet pak is based on approximately 1,500-acres, but is qualified through product purchase volumes. Details for this program follow.

- Grower may qualify for only one Emerald Extras Executive Paks Program, within corresponding product category.
 - Example: If grower qualifies in 1,500-acre sugar beet pak, he/she will not be eligible in the 400-acre sugar beet pak.
