

How the EMERALD EXTRAS EXECUTIVE PAKS Program Works 2011

Each Emerald Extras Executive Pak includes its own product categories and product lists, from which growers may select. The corn pak is based on approximately 1,500 acres, but is qualified through product purchase volumes. Details for this program follow.

- Grower may qualify for only one Emerald Extras Executive Paks Program, within corresponding product category.
 - Example: If grower qualifies in 1,500-acre corn pak, he/she will not be eligible in the 400-acre corn pak.
- Grower must purchase CROPLAN GENETICS® seed component.
