

Nitro Shield® IV

By WINFIELD UNITED

Insect Protection for Seed in Many Crops

Nitro Shield® IV seed treatment provides broad-spectrum protection against damaging insects for more than 20 crops. The active ingredient imidacloprid gives long-lasting protection during critical early-season crop development.

FEATURES AND BENEFITS

- Controls a broad spectrum of insects on a wide variety of crops.
- Systemic action also protects pre-treated seed against insect damage during storage.
- Convenient low use rates.
- Compatible with most fungicides and inoculants.

Labeled Crops
